

Your school's budget is about to go a lot further.

Fiddlehead™ helps you cut costs, extend your resources, support your teachers, and give your students more workstations.

The Fiddlehead hardware kit and preloaded software can turn a single desktop computer into as many as five student workstations that each perform and operate just as a dedicated standard desktop computer would.

Increase your school's computer workstations up to five times at minimal cost using your existing desktop computers. Cut computer hardware costs by up to 60%. Lower the energy expenses of running PCs by up to 70%. Integrate technology more effectively into your curriculum. Implement differentiated learning through the facilitation of project-based learning (PBL). And help your teachers

teach more effectively while more easily integrating technology into their classrooms.

Take charge with Fiddlehead—computer-sharing technology that goes beyond. *For more information, please visit our website. For questions or to arrange a presentation, please contact us at our North American headquarters.*

 **fiddlehead™**
Computer-sharing technology that goes beyond.

Increasing learning through technology.

Studies show that greater access to technology increases learning. With Fiddlehead, your school can put more computers in front of more students—or maintain your current computer-to-student ratio now and in the future—more affordably than ever before.

Unlike other, less-advanced computer-sharing technologies, Fiddlehead can turn a single desktop computer into as many as five student workstations—*without any loss of performance*. Each workstation performs and operates just as a dedicated standard desktop computer would, with the same operating system and software.

In an environment in which administrators face pressures from budgetary constraints, federal and state regulations, parental demands, and the needs of teachers and students, Fiddlehead can make a real difference for you *and* your school. Fiddlehead has been developed and thoroughly tested in real-world schools to make sure every feature is practical, powerful, and easy to use.

Teacher-friendly features.

With Fiddlehead, your teachers can:

- View, control, blank, or pause every student's workstation from their own "home screen"—or even show one student's work to the whole class.
- Find teacher-approved educational software for virtually any subject and grade level.
- Implement differentiated learning through the facilitation of project-based learning (PBL).
- Keep their students more engaged, attentive, and focused than ever before.
- More easily and effectively use electronic whiteboards.

Up to 60% lower hardware costs.

Fiddlehead can reduce your hardware costs significantly, for both initial installation and subsequent upgrades. For a quick estimate of how much *your* school may be able to save, use our cost calculator at myfiddlehead.com.

Special leasing options.

Manage costs more effectively with our special leasing options. For more information, visit myfiddlehead.com.

Reduced energy expenses.

By reducing electric consumption and cooling requirements, Fiddlehead can help lower the energy expenses associated with running full PCs by up to 70%.

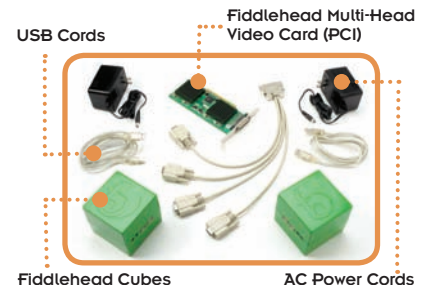

Technology into curriculum.

Fiddlehead has been specifically developed and tested in real-world schools to integrate with and facilitate curriculum development and implementation, including project-based learning (PBL). Visit myfiddlehead.com to download a PBL curriculum developed specifically for Fiddlehead integration.

Documented advantages.

In addition to being tested in real schools throughout the development process, Fiddlehead has been subject to rigorous, independent quality-control and performance testing at Syracuse University's CASE Center. For white papers and reports, visit myfiddlehead.com.
