C&S Companies Welcomes New Employees

Syracuse, New York, 5/19/2008 – C&S Companies is pleased to welcome the following new employees at our Syracuse office.

David Peterson joined C&S Companies as Chief Technology Officer in the firm's Fiddlehead™ group. He is the inventor of the core technology within Fiddlehead, and will be responsible for Fiddlehead™ product development and refinement. Prior to joining C&S, Peterson was the president of TekResource Service Corporation, a technology company he owned for 17 years. Peterson attended the United States Air Force Academy. He resides in Cazenovia.

Josh Wright joined C&S Companies as Project Development Technician in the firm's Fiddlehead™ group. He will be responsible for assisting with Fiddlehead™ product development and refinement. Prior to joining C&S, Wright was in a research and development role for an airport lighting company. He resides in Manlius and is a volunteer firefighter and EMT for the Manlius Fire Department.

Dominick Lisi joined C&S Companies in a sales role in the firm's Fiddlehead™ group. He will be responsible for bringing the Fiddlehead™ product into the primary and secondary education market. Prior to joining C&S, Lisi was a technology and social studies teacher at Jamesville-Dewitt High School. Lisi holds a bachelor's degree in psychology from the State University of New York at Cortland and a master's degree in science from LeMoyne College. He resides in Manlius.

Britney Strong joined C&S Companies as an inside sales representative in the firm's Fiddlehead™ group. She will be responsible for sales activities of the Fiddlehead™ product. Prior to joining C&S, Strong was a member service representative at Beacon Federal. Strong holds a bachelor's degree in professional studies and management from Cazenovia College. She resides in Manlius.

Fiddlehead™ is a proprietary computer-sharing technology that works with any modern desktop computer, leveraging excess computing power to run up to five individual workstations without any loss in performance. Fiddlehead supplies a software solution to a hardware problem by allowing deployment of significantly more desktop workstations for any given budget. In addition, the COSMOS™ technology within Fiddlehead provides a bridge from a Microsoft Windows® operating system to the open source software world, allowing the use of freeware available from a Linux® operating environment.

Visit www.myfiddlehead.com for more information on this exciting new product offer from C&S Companies.
